9

Trouble Shooting

CANNOT PAIR THE CAMERA SUCCESSFULLY

1. Check whether the camera is powered by micro USB (DC 5V)
2. If there are too many Wi-Fi connections around your device, turn them off to avoid any disturbance and pair again.
3. Check that the router is working properly and that it operates on 2.4GHz.
4. Check that the SSID and password are correct.

DOESN'T WORK PROPERLY or LOSS OF SIGNAL

1. Check whether the device is within coverage of your Wi-Fi router/repeater. Move the device or router to a different location
2. Check that the router is working properly

CANNOT RECORD VIDEOS

1. Check whether the camera has inserted microSD card.
2. Change the recording mode to "Record full-time".
